

We are the major independent distributor of Industrial Filtration in the UK

**┌ supplying all your  
filtration needs**

# product range

- Amine Conditioning and Recovery
- Air Intake Filters
- Air Filters
- Bag Filters
- Cartridge Filters
- Coalescers
- Compressed Air Filters
- Potable Water Filters
- Dust Collection
- Dewatering
- Filter Presses

**With Filterserve you can satisfy all your filter requirements from a single source of supply.**

**We have extensive warehousing facilities across the UK which allow us to keep a large, on shelf stock ready for immediate dispatch.**

- Glycol Conditioning and Recovery
- Hot Gas Filters
- Instrument Air
- Chemical Filters
- Lube and Fuel
- Membrane
- Oil Mist Eliminators
- Hydraulic Filter
- Oilywater Separators
- Process filters
- Spark Erosion
- Sintered Filters
- Strainers
- Non Woven Fabric
- Wire Erosion

**Filterserve adhere to a strict regime of continuous improvement and are truly independent of any manufacturer.**

**We offer impartial advice on a wide range of filters and ancillary spares.**

**We can also offer engineering expertise together with a high level of technical support.**

**Our aim is to give our customers the very best solution to help satisfy their filtration requirements.**

## We are the major independent distributor of Industrial Filtration in the UK

Filterserve has been independently supplying filtration and associated products for over 35 years. The company has established a wide and growing reputation and is renowned for its tailored approach to the exacting needs of the customer.

As the leading independent supplier of its type in the United Kingdom we have considerable experience of supplying to all types of industry including oil, gas, aerospace, specialist engineering and general engineering industries.

filters

Whilst retaining our independence we have built strong working relationships with the major filtration manufacturing companies allowing us to provide our clients with an unbiased, best solution product range.

With our extensive supplier base and technical knowledge we can supply a true one-stop shop and offer single source solutions. We start by carrying out on-site surveys to ascertain your filter requirements against your plant and equipment. This enables us to understand how to manage your filtration needs and develop cost effective solutions. We also continue to offer our customers independent advice on an ongoing basis.

At our central UK headquarters we have technical people who are capable of giving on-site support with the full resources of our first tier suppliers.

Our field based engineers can help solve any of your filtration problems.

With bases in England, Scotland, Wales and France, we continue to expand and increase our ability to distribute the market leading brands covering all elements of filtration and ancillary products around the globe.

ALL OUR PRODUCTS ARE SUBJECT TO QUALITY CONTROL PROCEDURES  
IN ACCORDANCE WITH OUR APPROVAL TO BSEN ISO 9001:2000

## SINGLE SOURCE SOLUTIONS

Our single source solution service is a guaranteed way to help you to cut costs, and reduce the headaches caused by peer to peer procurement. Our tailor made packages are designed to offer our clients the very best strategic purchasing service available.

Some key benefits from this essential service :-

- **FREE** site survey will create an accurate inventory of your stock levels and help ascertain your filtration requirements for site and plant equipment
- stock buy back service which can help free up much needed storage space
- customer exclusive stock holding (we can hold your critical stocks with no storage charges)
- fixed prices for a minimum period of 12 months plus. This will mean no sudden cost increases due to material price rises as your prices are fixed for the negotiated period
- self Billing options
- out of hours emergency call out service
- full support from our engineers including laboratory services, technical support, and informative reporting

## REPLACING AND REPLENISHING SPARES

Filterserve offers the most comprehensive range of filters and ancillary spares within the marketplace. We provide a 'one stop shop' that allows clients to procure all replenishable products, such as elements and gaskets in one safe and easy transaction secure in the knowledge that Filterserve supply fully warranted and traceable genuine proprietary items.

## LABORATORY AND ENGINEERING SERVICES

We are able to offer fluid and process analysis through our laboratory and engineering services. We can evaluate your needs and offer cost effective solutions to your filtration problems.

### LABORATORY SERVICES

- fluid monitoring with the use of a continuous particle counter
- offline testing using micropore testing equipment
- microscopic fluid analysis
- photographic evidence
- digital water testing
- hire of offline filtration

### ENGINEERING SERVICES

- process analysis on customer systems
- independent advice on current systems/processes used
- evaluation on options available to improve cost efficiency on systems within industry sector
- full system design changes co-ordinated by our engineering department
- replacement housing and valve systems for obsolete units or new systems
- air intake supply and installation on turbine systems
- quality audits on customer sites
- environmental advice on filtration
- Hilliard clutch replacements

# non woven

We are specialists in producing filtering media to specific sizes.

We can cut filter media into sheets that are used for a number of applications, the biggest being the filtration of cooking fats and oils. We can punch holes into the media at any required position as well as cut the media to any shape required. The media can be sewn into bags to fit Henry Penny style fryers.

We can convert filter media to your individual roll specifications. Roll converted media produced by us is used by the food industry and to filter machine coolant by manufacturing and engineering industries.

# manufacturing

We have in house manufacturing facilities for the production of a number of filter products. Our facilities include spinning, welding (mig, tig and spot), brazing, guillotining, circle and plasma cutting.

We also manufacture carbon filters and have on-site media conversion facilities. This also allows us to be able to provide you with a bespoke design and construction service for a wide range of products in a number of market sectors.

## MANUFACTURED FILTER PRODUCTS

- strainers
- silencers
- air intake filters

## MANUFACTURED CARBON FILTER CARTRIDGES

- plug and open ended filter cartridges

## MEDIA CONVERSION FACILITIES

- sintered propylene
- synthetic medias
